The image shows the Postman application interface. At the top, there's a header bar with icons for home, recent requests, history, and collections. Below this, the left sidebar contains a 'COLLECTIONS' section with 'My Collection' and an 'ENVIRONMENTS' section with 'SPECS' and 'FLOWS'. The main workspace is divided into two panes. The top pane shows the request configuration for a POST request to 'http://localhost:9000/employees/add'. It includes tabs for Docs, Params, Authorization, Headers, Body (selected), Scripts, Tests, and Settings. The 'Body' tab shows a raw JSON payload: {"id": 2, "name": "Zaid Shaikh ", "department": "Cloud Computing", "salary": 1500000}. The bottom pane shows the response, which is a 200 OK status with a response time of 23 ms and a body size of 178 B. The 'Body' tab is selected, showing the raw response text: '1 Employee Added'.
